

Range of services offered to the public and private health insurance schemes and the professional trade association:

- Diagnosis
- Crisis intervention
- Psychotherapy (Single- or Group setting)

On account of my licence in behaviour therapy for adults, children, and young people the psychotherapy is financed for all public and some private health insurance scheme patients. Other private patients can apply for a grant.

The after effects of a workplace accident, an attack etc. are usually financed from the relevant professional trade association. EMDR, as a method of trauma treatment is also covered, because of supportive scientific evidence.

- Participation at a quality circle is given
- Introduction of a practice QEP quality management scheme

Special range of offered services by personal relevant information. These additional offers have to be paid for privately:

- To overcome a dog phobia, we can use a trained therapy dog
- Professional control for employees and disseminators in education for adults and in pedagogical work with children and young people, as well as for professional colleagues
 - Further vocational training and conferences (Permit for dance movement therapy training, BTD, since August 1998)
